

## Mastering the artistry of bread packaging with *Loafmaster*

by IPEKA

### Introduction- Dealership

We are delighted to announce some exciting news at the outset of 2024. As part of our ongoing commitment to delivering innovative automated solutions, with great pleasure we announce our dealership agreement with IPEKA for the introduction of LoafMaster, a cutting-edge packaging solution tailored for Pita Bread.

### Benefits of using the LoafMaster

With precision, the LoafMaster ensures precise and efficient bread packaging, maintaining the quality of each loaf. This innovative system streamlines the bread packaging process, saving valuable time for bakery operations, and reducing the learning curve for bakery staff. You can achieve a consistent and professional presentation for each pack, enhancing overall product quality.

### Key Features

Powerful automatic packaging machine with clipband closure capability suitable Pita bread and for other various bakery products. The optimal LoafMaster operating speed depends on the product being packaged, and in most cases is around 35 bags per minute.

- ✓ Stacks with a minimum diameter of 28-15cm or from 32-18 cm.
- ✓ Maximum Height of Stack of Pitas is 100 mm.
- ✓ Equipped with Date Printing Device.
- ✓ Rotary Table for ready bags.

### Conclusion

We are excited about the opportunities this partnership presents for our clients and the industry as a whole. Together with IPEKA, we look forward to delivering unparalleled packaging solutions that meet the evolving needs of your business.

*Thank you for your continued trust!*
